

ULYSSES FOOTE-MCNABB

me@uly.fm – (206) 673-6303 – Seattle, WA – github.com/ulyfm

EDUCATION

University of Washington

BS Biochemistry; Neuroscience

2017 – 2021

Seattle, WA

- GPA: 3.52

Bellevue College

BS Computer Science (In Progress)

2022 – Present

Bellevue, WA

WORK EXPERIENCE

Fred Hutchinson Cancer Center

NE Research Associate

Jan 2020 – Present

Seattle, WA

- Performed cloning, protein expression and purification.
- Used flow cytometry and microplate assays to investigate protein binding.
- Performed data analysis and modeling (including AlphaFold) with Python.

SKILLS

- Programming Languages: Java, Python
- Biochemistry Techniques: Tissue Culture, Cloning, Protein Purification, Microplate Assays, Flow Cytometry, Biopython

PROJECTS

Synthetic Antivenom Python, Biopython, Tissue Culture, Flow Cytometry

Led a project to develop a synthetic antivenom proof-of-principle. Leveraged Biopython and AlphaFold-Multimer to generate a library of drug candidates. Used flow cytometry for candidate screening.
